

Pre design art film

Life should be beautiful, and it is the small touches that make it so.....

Decorative window films are an often overlooked but integral part of any environment that you are creating. Whether it's your home, your child's play area, or your car... we can help you turn any flat glass surface into a work of art.

Artistic

Our Clients from around the world use Ecodrive window films to enhance privacy, while adding a creative touch to their spaces. For example, commercial buildings are dramatically increasing the use of internal glass walls with frosted films as partitioning. This allows for natural light in offices, creating greater work productivity and privacy, as well as the illusion of more space. Our films come in an array of attractive patterns and shades that can be easily removed and replaced to update the appearance at a later time. We also customize logos, designs, lettering and graphics using the most advanced electronic technology, giving you endless creative opportunities to transform any space to reflect your unique vision and personality.

Cost-Effective

Although our decorative films are designed for the long-term, they can easily be removed or updated without having to replace costly glass panels. This is ideal for companies that want to increase the visual impact of a new corporate logo or sales promotion at a fraction of the cost of traditional etching. Our team of highly-skilled engineers provide on-site installation to your windows, doors, decorative mirrors, dividers, promotional structures and any other glass surface.

Versatile

There are many uses for Ecodrive decorative films. Our frosted, tinted and beautifully designed films add an artistic touch and fresh-look to the various rooms in a home-a bathroom, den, living room, or a child's play area. Architects are increasingly using these films as an integral part of their design and construction process, be it for banks, restaurants, health clubs, hotel foyers, airports, or houses. Many new building projects are specifying our film patterns, with the film's theme continuing throughout the space. And unlike other decorative glass processes, Ecodrive films can be removed if desired. Therefore, most landlords do not object to their tenants installation of our films.

Long Lasting

Ecodrive decorative films are suited for both interiors and exteriors. They can be applied to glass acrylic, or poly carbonate surfaces, without compromising on their durability or beauty. Our films are of the highest quality and we take great care in their design and installation.
