

Waste, Recycling and Hygiene Services

Clinical Waste Solutions

At FCC Environment, we have been specialising in the collection and disposal of clinical waste for over 15 years. We know that time spent not caring for your customers is time wasted. That's why we aim to take the hassle out of your waste management with our clinical waste solutions.

FCC Environment provides an inclusive service for the following clinical waste streams:

- | | |
|-------------------|-----------|
| ▶▶ Infectious | ▶▶ Dental |
| ▶▶ Offensive | ▶▶ Sharps |
| ▶▶ Pharmaceutical | |

The FCC Environment clinical waste service package begins with a free survey of your needs, after which we'll supply you with containers and packaging materials tailored to your operations. We offer a guaranteed collection schedule, and a dedicated Contract Manager who understands your business and will help you work towards zero waste to landfill.

You can rely on our experienced team to store your records and pass the required information to the final disposal sites on your behalf, and we also carry out annual reviews to ensure you maintain compliance and give you peace of mind. Our secure handling and licensed disposal practices meet environmental requirements and Duty of Care audits, and we maintain fully compliant legal documentation to satisfy your HSE obligations.

We also offer training to ensure your employees segregate and handle waste safely and professionally.

Our clinical waste service package is trusted by a wide variety of businesses including dental practices, medical centres, pharmacies, nursing homes, veterinary practices, funeral homes, opticians, educational establishments and beauty and therapy salons.

All of our clinical waste services comply with BS7320:2012 and UN 3291 Standards, so you can be confident in your compliance, and importantly, the safety of your staff, visitors and customers.
