eicó

eicó plant in Iceland - Kópavogur

eicó was created at the turn of the millennium following several years of research, development and exhaustive testing in our laboratory. For example, eicó's washable "Alterior" matt took four years to develop and test before its launch into the market. The result of such comprehensive work is a range of premium quality, solvent-free paints with exceptional environmental credentials. What followed next was a combination of independent laboratory tests, as well as extensive "field testing" of eicó paints in conjunction with professional paint teams across London. Critical feedback from these professionals enabled us to refine further the eicó paint range, such as perfecting its ease of application. Now, we believe that eicó offers the highest quality paint while maintaining its negligible environmental impact. The full range of eicó paints was launched in 2009.

Our paints do not contain any NPEO's, APEO's, formaldehyde and contain either 0% or very low levels of VOC's. Furthermore, we have benchmarked eicó paints according to the toughest VOC standards (the European Union) of anywhere in the world.

eicó "Alterior" products are 100% acrylic paints with hardly any odour. Together with their durability, this makes them ideal for schools, children's rooms and those with any asthma related or respiratory problems. Furthermore, eicó paints are long lasting, non-yellowing and have excellent colour retention. In addition to widespread use in residential premises, we have also carried out considerable work on behalf of hotels, hospitals, commercial buildings and offices.

Together with our headquarters in London, we are now established in Hong Kong and we are assessing additional opportunities in China and Australia. We have absolute conviction in the quality of eicó paints, which are the result of a huge amount of hard work over many years. We are very proud that we have been able to create the eicó paint range while simultaneously upholding the most demanding environmental standards. As a result, we have built a substantial following in the UK market with an increasing amount of new enquiries for eicó paint from the UK and around the world.

Alterior

## Alterior Matt

Alterior Matt is a high quality waterborne paint, made of 100% pure Acrylics. It dries to a non-yellowing, flat finish and has excellent colour retention. It has low dirt pick-up, good weathering properties and washability. Adheres well to aged alkyd paints. Alterior Matt is easy to use and has great coverage.

Alterior

### AREA OF USE

Interior and exterior: walls, ceilings, roof tiles and primed structural steel.  
Substrates: concrete, masonry, cements, rendering plaster, plaster board, lining paper, glass fibre, woodwork (primed), etc.

### TECHNICAL INFORMATION

Gloss: 5 (Matt)

Volume solid: 38%

Solvent: Water

Drying time:  
2-3 hours (touch dry)

Coverage:  
8-10 m<sup>2</sup>/L

Recoating time:  
8-10 hours

Clean method: Water

Tin Size:  
1L, 2.5L, 5L, 10L

Our paints do not contain any  
NPEO's, APEO's

VOC contains: 0.8g/L

EU limit for this product (Cat A/e):  
140g/litre(2007),30g/litre(2010)

Wipe times: 2000

Clean Air  
Clean Water  
Clean Paint

A superior water based multi surface paint.

iCan is a sister brand under zicó. iCan Paints specialise in the manufacture of water-based, high quality paints. The iCan Paints Collection includes everything DIY and professional decorators require, from priming walls, metal, woodwork and other surfaces to imbuing them with a perfect finish. iCan is perfect for when a tougher and harder paint is needed but you still want to avoid solvent-based paints. iCan is beneficial for those who wish to use a paint that adheres to the EU directive for paint products. iCan is perfect for when you need to block flash rust or permeated stains. If you desire a porcelain finish, iCan has got the necessary products.

iCan Paints products include iCan Grepp-V Primer Sealer Stain, and metallic series, a true metallic paint for indoor and outdoor use.

\*Clean steam emissions from our factory

## Grepp-V Primer

GREPP-V is a waterborne Acrylic-Alkyd white-pigmented primer sealer stain and flash rusting blocking primer for interior and exterior surfaces. It has excellent adhesion to most new or previously painted surfaces. It is an ideal product for those who want alkyd based quality in a waterborne primer. It is fast drying and can be tinted to various colours. iCan GREPP-V Can be over painted with acrylic/alkyd based paint.

### AREA OF USE

Interior and exterior: walls, ceilings, roof tiles, wooden and metal surfaces  
Substrates: wood, metal, plaster, gypsum board, hardboard, tiles, glass, walls, bricks, Lead, PVC, concrete, fibreglass, wallpaper, Formica etc.

## iCan Munncrete

Munncrete is a new, revolutionary and multi-functional cement-porcelain coating. It provides a unique and decorative 'seamless and impervious coating system. It quickly covers unsightly joints and fissures and offers a stylish and practical solution by transforming large surfaces such as walls, floors, ceilings, kitchens, bathrooms, counters, showers, wet rooms and swimming pools. Combining contemporary style with a hint of the modish industrial, Munncrete is available in an array of attractive colour choices. It can also be tinted to match specific shades and perfectly complement any colour scheme - ideal for business workplaces, homes, offices and retail outlets. MICROCEMENT MUNNCRETE - Highly Resistant and Decorative Seamless Coatings.

## iCan Metallic

iCan Metal paint is water-borne acrylic paint for painting small interior walls and ceilings, furniture, knick-knacks, etc. Creates a beautiful metallic finish. Used normally as a primer and finished coat. Base colours are gold and silver that can be tinted to any colour of your choice.

## Varnish

Varnish is a water-based bright and clear coating for indoor painted and natural wood surfaces. Varnish dries quickly and creates a durable and wear-resistant finish. Suitable on everything from floor to furniture made of wood in a domestic environment. It is not suitable for use on waxed or oiled wood surfaces. Our varnish is one of the lowest VOC clear-coating products in Europe.

### AREA OF USE:

Natural wood surfaces, previously varnished surfaces, stained or painted surfaces. It is also suitable for all types of wooden flooring.

### TECHNICAL INFORMATION

 Gloss: 85 (Gloss)	 Volume solid: 38%
 Solvent: Water	 Drying time: 2-3 hours (touch dry)
 Coverage: 8-10 m <sup>2</sup> /L	 Recoating time: 8-10 hours
 Clean method: Water	 Tin Size: 1L, 5L
 Our paints do not contain any NPEO's, APEO's	 VOC contains: 90 g/L
 EU limit for this product (Cat A/e): 150g/litre(2007),130g/litre(2010)	

## Matt/Semi-Matt Varnish

Matt/Semi-Matt Varnish is a water based bright and clear coating for bare wood surfaces and painted wood surfaces indoors. Matt Varnish dries quickly and creates a durable and wear-resistant finish. Suitable on everything from floor to furniture made of wood in a domestic environment. It is not suitable for use on waxed or oiled wood surfaces. Matt Varnish is one of the lowest VOC clear-coating products in Europe.

### AREA OF USE:

Natural wood surfaces, previously varnished surfaces, stained or painted surfaces. It is also suitable for all types of wooden flooring.

### TECHNICAL INFORMATION

 Gloss: 10 /45 (Matt/Semi-Matt)	 Volume solid: 38%
 Solvent: Water	 Drying time: 2-3 hours (touch dry)

 Clean method: Water	 Tin Size: 1L, 5L
 Our paints do not contain any NPEO's, APEO's	 VOC contains: 90g/L
 EU limit for this product (Cat A/e): 150g/litre(2007),130g/litre(2010)	

## Industrial

---

### Industrial Paint

---

#### iCan Guard

Mineral protective coating for impregnating porous materials, such as concrete. It also acts as a rust-proof coating for rebar. A product that will extend the life of any concrete construction.

---

#### FG-40

FG-40 is a fire-proof coating with a maximum melting time of 1.5 hours on metal and UK class A wood. In addition, it is a wood preservative, moisture, pest and UV resistant, and also suitable for fabric.

---

#### iCan Epoxy

Water based two pack epoxy floor paint. Very strong and durable floor paint for public buildings, garages, industrial floors etc.

---

#### Roadline 200

Water-based single pack road marking paint. It is quick drying, long lasting and can be painted up to 280 microns thick.

---

#### Anti-Bact 20-40

Anti bacterial hygiene paint for hospital operating theaters/ICU, food processing plants and any other area that needs to be clinically clean.

---

## Testimonials

---

I have had the great pleasure of using eicó paint for over 3 years now both in my home and my business. The paint is incredible and being nontoxic meant I could paint my salon with 2 coats in one day and there was literally no smell at all the next day, and it dries so quickly too, an added bonus when you need to keep your business open. The choice of colours which you can choose is endless. Joakim and team are so professional and accommodating to work with, nothing was a problem. I will never use any other paint apart from eicó ever again and knowing Joakim and his experience and professionalism makes my life a whole lot easier. I guarantee if you haven't used eicó paint before, you will soon be converted.

--- Elaine, Elaine Swanson Hong Kong

The eicó navy deep sea blue gloss paint we created for our front door in collaboration with Joakim made such a beautiful statement at our entrance - no one entered our home without noticing the majestic welcome. The eicó Alaskan husky taupe creation was our chosen color throughout the interior and made us feel warm and comfortable every day.

The ultimate piece of resistance from our Co conspiracy with Anita and Joakim was the Jackson Pollack inspired desk we designed and splattered whilst repurposing an old piece of furniture.

All in all, eicó paint met all our demands for color and durability while protecting us with its top eco quality.

--- Kathleen, Chabot Armagnac

## Testimonials

---

My wife and I recently painted our bedroom with eicó's metallic grey paint. It looks stunning and is good for the environment and our health. We will only use eicó products in the future.

--- Geoff, Tequila Kola

When living in an over-crowded and polluted city, it is refreshing to find a company with environmental protection at its core. CEO, Joakim Cimmerbeck is committed to introducing clean, safe paint to Hong Kong and China. Say good bye to paint-induced allergies thanks to eicó paints' pure water formula.

--- Karen, Karen Prochazka Jewellery Design

We love working with eicó!

They have the same view of sustainability and consciousness as we have, which really provides a great working foundation. We have used their paints in our interior projects with great success and clients are always happy with the result.

We especially loved working with them on the trend colour collection for 2017/18 for Shenzhen International Furniture Fair!

--- Katarina, Boris Design Studio
