

Biodegradable Food Packaging

PRODUCT LIST

Company Introduction

Shandong Watson environmental protection packaging technology Co., Ltd. is a scientific and technological environmental company, specializing in the production of 100% biodegradable pulp tableware. Our factory covers an area of 30,000 square meters. We have advanced fully automatic production equipment, and professional R&D and production technology and management team. We have a complete production process and quality management system to provide customers with various environmental packaging requirements.

Our Eco-Friendly tableware are made from Sugarcane bagasse fiber and bamboo fiber, they are 100% compostable material. They can be completely degraded into organic fertilizers. All of our products are freezer and microwave safe, as well as being leak resistant, it offers reliable strength, also can be used for cold foods or hot foods. The products had have passed FDA, LFGB, and other international tests.

The products are Exported to all over the world, mainly The Europe, America, Japan, South Korea and other countries and regions.

We not only produce our own designed products, but also can customize the exclusive products according to the requirements of customers to meet their markets, ensuring the good quality products and service.

■ Product and first inspection

Why we choose bagasse?

The bagasse products can be completely decomposed into non-toxic components that will not harm the environment, because it is already organic. no trees need to be cut down and the bagasse waste was given a new lease of life. The compost residues can fertilize and improve soil health. We choose a new material also a new lifestyle.

100% Compostable &
Biodegradable

Sustainable &
No Plastic

Grease and
water proofing

Microwave, freezer, oven safe,
Up to 392°F (200°C)

Degraded in 45-90 days in
a composting facility
